RECEIVED

Dear Sir/Madam

USA

Boral Limited: 12g3-2(b) Information - File No. 82-5054

We enclose information which Boral Limited has lodged with Australian Stock Exchange Limited ("ASX") since 22 August 2002 and is required to furnish to the Securities and Exchange Commission pursuant to Rule 12g3-2(b).

The information is:-

- 1. A media release titled "Boral Agrees to Purchase Rocla Persada in Indonesia" issued on 27 August 2002.
- 2. A letter dated 30 August 2002 attaching the audited accounts of Boral Limited and controlled entities for the year ended 30 June 2002 comprising the financial report, the concise financial report and the PROCESSED Directors' Report.
- A media release titled "Boral acquires one of Australia's largest \$\Psi\$ SEP 2 0 2002 plasterboard distributors" issued on 2 Section 1. 3. plasterboard distributors" issued on 2 September 2002.

Yours faithfully

M.B. Scobie

> RECEIVED 2002 SEP 1 0 2002

2 September 2002

Boral acquires one of Australia's largest plasterboard distributors

Boral announced today that it had acquired Stud & Track, its largest plasterboard distributor in NSW.

The purchase of Stud and Track, with annual sales of around \$25 million, significantly adds to Boral's plasterboard distribution infrastructure in NSW and reflects the previous owner's wish to retire from the business.

Ross Batstone, Executive General Manager of Boral Plasterboard, said: "The acquisition is important for Boral because it gives our plasterboard distribution infrastructure greater scale and coverage. There is the opportunity to service customers in a more integrated way and to realise the benefits of efficient distribution and retailing"

"The combination of our specialist independent distributors and our company owned outlets creates a leading network providing customers with an industry competitive range of interior wall and ceiling linings products and services" he added.

The acquisition is based on staged payments over 2 years and will be earnings per share positive for Boral in the first year.

For further information please contact:

Dear Sir

Annual Accounts

We attach the audited accounts of Boral Limited and controlled entities for the financial year ended 30 June 2002 comprising:-

- (i) the financial report.
- (ii) the concise financial report.
- (iii) the Directors' Report.

We confirm that the Company will be treated as having lodged the reports with the Australian Securities and Investments Commission by reason of having given them to you.

Yours faithfully

M.B. Scobie

Company Secretary

The statements of cash flows should be read in conjunction with the accompanying notes set out on pages 4 to 39, which form an integral part of the financial statements.

The following is a summary of significant accounting policies which have been adopted in the presentation of this financial report which is a general purpose financial report prepared in accordance with Accounting Standards, Urgent Issues Group Consensus Views, other authoritative pronouncements of the Australian Accounting Standards Board and the Corporations Act 2001. It has been prepared on an historical cost accounting basis. These accounting policies have been consistently applied by each entity in the consolidated entity and, except where there is a change in accounting policy, are consistent with those of the previous year.

RECLASSIFICATION OF FINANCIAL INFORMATION:

To ensure comparability with the current reporting period, certain comparative items have been reclassified in the financial statements. Significant changes in disclosure relate to provisions for asset impairment being disclosed against the assets to which they relate, consistent with the approach required by AASB 1044 Provisions, Contingent Liabilities and Contingent Assets.

CHANGES IN ACCOUNTING POLICY:

Segment reporting: The consolidated entity has applied the revised AASB 1005 Segment Reporting (issued in August 2000) for the first time from 1 July 2001. Individual business segments have been identified on the basis of grouping individual products or services subject to similar risks and returns. The new segments reported are: Construction Materials, Building Products, USA, Asia. Comparative information has been restated for the changes in definitions of segment revenues and results. There is no financial effect on the group as a result of these changes.

Earnings per share: The consolidated entity has applied AASB 1027 Earnings Per Share (issued in June 2001) for the first time from 1 July 2001. Basic and diluted earnings per share ("EPS") for the comparative period ended 30 June 2001 has been adjusted so that the basis of calculation used is consistent with that of the current period.

Basic EPS earnings are now calculated as net profit or loss, rather than excluding extraordinary items.

Diluted EPS earnings are now calculated by only adjusting the basic EPS earnings for the after tax effect of financing costs and the effect of conversion to ordinary shares associated with dilutive potential ordinary shares, rather than including the notional earnings on the funds that would have been received had the potential ordinary shares been converted. The diluted EPS weighted average number of ordinary shares now includes the number of shares assumed to be issued for no consideration in relation to the dilutive potential ordinary shares, rather than the total number of dilutive potential ordinary shares. The number of ordinary shares assumed to be issued for no consideration represents the difference between the number that would have been issued at the exercise price and the number that would have been issued at the average market price. The identification of dilutive potential ordinary shares is now based on net profit or loss from continuing ordinary operations, not net profit or loss before extraordinary items and is applied on a cumulative basis, taking into account the incremental earnings and incremental number of shares for each series of potential ordinary share. There is no material impact on the group as a result of applying this standard.

PRINCIPLES OF CONSOLIDATION:

Controlled entities: The consolidated financial statements of the consolidated entity include the financial statements of Boral Limited and all entities in which it has a controlling interest. Outside interests in the reserves and profits of entities that are under the control of Boral Limited are shown as a separate item in the consolidated financial statements. Where control of entities commenced or ceased during the year, the results are included only from the date control commenced or up to the date control ceased.

Associates: Associates are those entities, other than partnerships, over which the consolidated entity exercises significant influence and which are not intended for sale in the near future. In the consolidated financial statements, investments in associates are accounted for using equity accounting principles. Investments in associates are carried at the lower of the equity accounted amount and recoverable amount. The consolidated entity's equity accounted share of the associates' net profit or loss is recognised in the consolidated statement of financial performance from the date significant influence commences until the date significant influence ceases. Other movements in reserves are recognised directly in consolidated reserves.

Joint venture entities: In the consolidated financial statements, investments in joint venture entities, including partnerships, are accounted for using equity accounting principles. Investments in joint venture entities are carried at the lower of the equity accounted amount and recoverable amount. The consolidated entity's share of the joint venture entity's net profit or loss is recognised in the consolidated statement of financial performance from the date joint control commenced until the date joint control ceases. Other movements in reserves are recognised directly in consolidated reserves.

Joint venture operations: The consolidated entity's interests in unincorporated joint ventures are brought to account by including its proportionate share of joint ventures' assets, liabilities, and expenses and the consolidated entity's revenue from the sale of its share of output on a line-by-line basis, from the date joint control commences to the date joint control ceases.

Transactions eliminated on consolidation: Unrealised gains and losses and inter-entity balances resulting from transactions with or between controlled entities are eliminated in full on consolidation. Unrealised gains resulting from transactions with associates and joint ventures, including those relating to contributions of non-monetary assets on establishment, are eliminated to the extent of the consolidated

entity's interest. Unrealised gains relating to associates and joint venture entities are eliminated against the carrying amount of the investment. Unrealised losses are eliminated in the same way as unrealised gains, unless they evidence a recoverable amount impairment.

REVENUE RECOGNITION:

Revenues are recognised at fair value of the consideration received net of the amount of goods and services tax (GST). Exchanges of goods and services of the same nature and value without any cash consideration are not recognised as revenues.

Sale of goods revenue: Sale of goods revenue is recognised (net of returns, discounts and allowances) when the control of goods passes to the customer.

Rendering of services revenue: Revenue from rendering services is recognised in proportion to the stage of completion of the contract when the stage of contract completion can be reliably measured. The stage of completion is assessed by reference to surveys of work performed. Where the outcome of a contract cannot be reliably estimated, contract costs are expensed as incurred. Where it is probable that the costs will be recovered, revenue is only recognised to the extent of costs incurred. An expected loss is recognised immediately as an expense.

Interest revenue: Interest income is recognised as it accrues.

Sale of non-current assets: The gross proceeds of asset sales are included as revenue of the consolidated entity. The profit or loss on disposal of assets (other than property held for resale) is brought to account at the date an unconditional contract is signed.

Land held for resale: Revenue and profit from sale of property held for resale is recognised either on settlement or when all of the following conditions have been met: contracts are exchanged; a significant non-refundable deposit is received; and material conditions contained within the contract are met.

Dividends: Revenue from dividends and distributions from controlled entities is recognised by the parent entity when they are declared by the controlled entities. Revenue from dividends from associates is recognised by the parent entity when dividends are received. Revenue from dividends from other investments are recognised when received. Dividends received out of pre-acquisition reserves are eliminated against the carrying amount of the investment and not recognised in revenue.

INCOME TAX: The liability method of tax effect accounting has been adopted whereby income tax expense for the period has been matched with accounting profit after allowing for permanent differences relating to deductibility or assessabity for income tax purposes of certain items. The tax effect of timing differences, which arise from items being brought to account in different periods for income tax and accounting purposes, is carried forward in the balance sheet as a future income tax benefit or a provision for deferred income tax.

Future income tax benefits are not brought to account unless realisation of the asset is assured beyond reasonable doubt. Future income tax benefits relating to entities with tax losses are only brought to account when their realisation is virtually certain. The tax effect of capital losses is not recorded unless realisation is virtually certain.

GOODS AND SERVICES TAX: Revenues, expenses and assets are recognised net of the amount of goods and services tax (GST), except where the amount of GST incurred is not recoverable from the Australian Tax Office (ATO). In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the ATO is included as a current asset or liability in the statement of financial position.

Cash flows are included in the statement of cash flows on a gross basis. The GST components of cash flows arising from investing and financing activities which are recoverable from, or payable to, the ATO are classified as operating cash flows.

BORROWING COSTS: Borrowing costs include interest, amortisation of discounts or premiums relating to borrowings, amortisation of ancillary costs incurred in connection with arrangement of borrowings and lease finance charges. Borrowing costs are expensed as incurred unless they relate to qualifying assets. Qualifying assets are assets which take more than 12 months to get ready for their intended use or sale. Where funds are borrowed specifically for the acquisition, construction or production of a qualifying asset, the amount of borrowing costs capitalised is that which is incurred in relation to that borrowing, net of any interest earned on those borrowings. Where funds are borrowed generally, borrowing costs are capitalised using a weighted average capitalisation rate.

FOREIGN CURRENCIES:

Transactions: Foreign currency transactions are translated to Australian currency at the rates of exchange ruling at the dates of the transactions. Amounts receivable and payable in foreign currencies at balance date are converted to Australian dollars at the exchange rates ruling at balance date. Exchange differences relating to amounts receivable and payable in foreign currencies are brought to account as exchange gains or losses in the statement of financial performance in the financial year in which the exchange rates change, except where:

hedging specific anticipated transactions or net investments in self-sustaining operations

- relating to amounts payable or receivable in foreign currency forming part of a net investment in a self-sustaining foreign
 operation. In this case, the exchange difference, together with any related income tax expense/revenue, is transferred to the
 foreign currency translation reserve on consolidation
- relating to acquisition of qualifying assets, where qualifying assets are assets which take more than 12 months to prepare for their intended use or sale.

Translation of controlled foreign operations: Exchange differences in respect of overseas controlled operations, associates and joint ventures, resulting from the translation of assets and liabilities at exchange rates ruling at balance date and revenue and expense items at average rates for the period, together with exchange differences in respect of long term foreign currency borrowing's of Boral Limited which have been designated as being hedged against the net assets of overseas controlled entities have been taken to the foreign currency translation reserve on consolidation, net of income tax where applicable.

RECEIVABLES: Trade debtors to be settled within 60 days are carried at amounts due. The collectability of debts is assessed at balance date and specific provision is made for any doubtful accounts.

INVENTORIES AND WORK IN PROGRESS: Inventories and work in progress are valued at the lower of cost (including quarry and factory overheads where applicable) and net realisable value. Cost is determined predominantly on the first-in-first-out basis of valuation. Net realisable value is determined on the basis of each entity's normal selling pattern. Expenses of marketing, selling and distribution to customers are estimated and are deducted to establish net realisable value.

Land held for resale: Development properties are carried at the lower of cost and net realisable value. Cost includes the costs of acquisition, development, and holding costs such as interest, rates and taxes. Borrowing costs and other holding costs incurred after completion of development are expensed as incurred.

CONSTRUCTION CONTRACTS IN PROGRESS: Construction contracts in progress are valued at cost plus profit determined by the percentage of completion method where the profit can be reliably determined or otherwise when a contract is completed. Costs include both variable and fixed costs directly related to specific contracts, and those which can be attributed to contract activity in general and which can be allocated to specific contracts on a reasonable basis. Also included are costs expected to be incurred under penalty clauses and recitification provisions. Provisions for losses are made in the financial statements for actual or anticipated losses as soon as the loss is identified. Payments received in advance of performance of contracts and services are not brought to account as income.

RECOVERABLE AMOUNT OF NON-CURRENT ASSETS VALUED ON A COST BASIS: The carrying amounts of non-current assets valued on the cost basis are reviewed at each reporting date to determine whether they are in excess of their recoverable amount. If the carrying amount of a non-current asset exceeds its recoverable amount, the asset is written down to the lower amount. The write down is recognised as an expense in the statement of financial performance in the reporting period in which it occurs. Where a group of assets working together supports the generation of cash inflows, recoverable amount is assessed in relation to that group of assets. The methodology applied in assessing the recoverable amounts of non-current assets includes, but is not limited to, an analysis of expected future cash flows discounted to their present value.

GOODWILL: Goodwill, being the excess of the cost of acquisition incurred over the fair value of the identifiable net assets acquired, is amortised to the statement of financial performance using the straight line method of calculation over the period of time during which the benefits are expected to arise, but not exceeding twenty years. The unamortised balance of goodwill is reviewed at each reporting date and recognised as an expense in the statement of financial performance to the extent that future benefits are no longer probable. The methodology applied in carrying out the review of the unamortised balance of goodwill does include, but is not limited to, an analysis of expected future cash flows discounted to their present value.

DEFERRED EXPENSES: Expenditure is deferred to the extent that management consider that it is probable that future economic benefits embodied in the expenditure will eventuate and can be reliably measured. Deferred expenses are amortised over the period in which the related benefits are expected to be realised. The carrying value of deferred expenditure is reviewed in accordance with the policy set out under recoverable amount of non-current assets.

INVESTMENTS:

Controlled entities: Investments in controlled entities are carried in Boral Limited's financial statements at the lower of cost and recoverable amount. Dividends and distributions are brought to account in the statement of financial performance when they are declared by the controlled entities.

Associates: In Boral Limited's financial statements, investments in associated entities are carried at the lower of cost and recoverable amount. Income from dividends is brought to account as revenue at the time the dividend is paid by the associate.

Other companies: Interests in listed and unlisted companies which are not controlled entities nor associated entities are treated as investments and only dividend income is brought into the consolidated results. The carrying values are reviewed annually to ensure that they do not exceed recoverable amounts.

PROPERTY, PLANT AND EQUIPMENT:

Acquisition: Items of property, plant and equipment are initially recorded at cost and depreciated as outlined below. The cost of property, plant and equipment constructed by the consolidated entity includes the cost of materials and direct labour. The proportion of overheads and other incidental costs directly attributable to its construction are also capitalised to the cost of property, plant and equipment. Borrowing costs are also capitalised to the cost of constructed property, plant and equipment using a weighted average capitalisation rate.

Disposal of assets: The gain or loss on disposal of assets is calculated as the difference between the carrying amount of the asset at the time of disposal and the proceeds of disposal, and is brought to account as profit or loss in the period in which the disposal occurs. Any realised revaluation increment relating to the disposed asset standing in the asset revaluation reserve at the time of disposal is transferred to retained earnings.

Leased plant and equipment: Leases of plant and equipment which are classified as finance leases are capitalised and amortised over the period during which benefits are anticipated. Other leases are classified as operating leases and the lease costs are expensed as incurred.

Depreciation and amortisation: Depreciation and amortisation are charged on property, plant and equipment at rates which provide for the write down from cost or valuation over the anticipated period of their useful life to the consolidated entity. Depreciation of property, plant and equipment (see note 10) has been determined by the straight line method.

EMPLOYEE ENTITLEMENTS: Provision is made in the financial statements for benefits accruing to employees in relation to long service leave and annual leave. The provision for employee entitlements to annual leave has been calculated at nominal amounts. The provision for employee entitlements to long service leave represents an estimation of the present value of the future cash outflows. Related on-costs have also been included in respect of annual leave and long service leave. Employee contributory superannuation funds exist to provide benefits for employees and their dependants on retirement, disability or death. Where shares are issued to, or purchased for, employees as remuneration for past services, the fair value of the shares issued or purchased is expensed. The fair value of the shares issued is recorded in contributed equity. Other shares issued to employees are recorded in contributed equity at the fair value of consideration received, if any. Administrative costs are expensed.

PAYABLES: Liabilities are recognised for amounts to be paid in the future for goods and services received. Trade accounts payable are normally settled within 60 days.

INTEREST BEARING LIABILITIES: Bank loans are carried on the statement of financial position at their principal amount, subject to set-off arrangements. Interest expense is accrued and included in "Trade creditors".

DERIVATIVES: The consolidated entity is exposed to changes in interest rates, foreign exchange rates and commodity prices from its activities. The consolidated entity uses the following derivative financial instruments to hedge these risks: interest rate swaps, forward rate agreements, interest rate options, forward foreign exchange contracts and futures commodity fixed price swap contracts. Derivative financial instruments are not held for speculative purposes.

Hedges: Where specific hedge transactions are designated as a hedge for the purchase or sale of goods or services or an anticipated interest transaction, gains or losses arising up to the date of the anticipated transaction, together with any costs or gains arising at the time of entering into the hedge are deferred and included in the measurement of the transaction. Any gains or losses on the hedge transaction after that date are included in the statement of financial performance.

The net amounts receivable or payable under forward foreign exchange contracts and the associated deferred gains or losses are recorded on the statement of financial position from the date of inception of the hedge transaction. The net receivables or payables are revalued using the foreign currency current at reporting date.

Where a hedge transaction is terminated early and the anticipated transaction is still expected to occur as designated, the deferred gains and losses that arose on the hedge prior to its termination continue to be deferred and are included in the measurement of the purchase or sale or interest transaction when it occurs. Where a hedge transaction is terminated early because the anticipated transaction is no longer expected to occur as designated, deferred gains and losses that arose on the hedge prior to its termination are included in the statement of financial performance for the period.

Where a hedge transaction is redesignated as a hedge of another transaction, gains and losses arising on the hedge prior to its redesignation are only deferred where the original anticipated transaction is still expected to occur as designated. Where the original anticipated transaction is no longer expected to occur as designated, any gains or losses relating to the hedge instrument are included in the statement of financial performance for the period. Gains or losses that arise prior to and upon maturity of transactions entered into under hedge rollover strategies are deferred and included in the measurement of the hedged anticipated transaction if the transaction is still expected to occur as designated. If the transaction is no longer expected to occur, the gains and losses are recognised immediately in the statement of financial performance.

Foreign exchange differences relating to foreign currency transactions hedging a net investment in a self-sustaining foreign operation, together with any related income tax expense/revenue, are transferred to the foreign currency translation reserve on consolidation.

Interest rate swaps and forward rate agreements: Interest payments and receipts under interest rate swap contracts and realised gains and losses on forward rates agreements are recognised on an accruals basis in the statement of financial performance as an adjustment to borrowing costs during the period.

Interest rate options: Interest rate options are purchased to hedge interest rate exposures. The premiums paid on interest rate options and any realised gains or losses on exercise are held in other assets and are amortised to borrowing costs over the terms of the agreements.

Forward foreign exchange contracts: Forward foreign exchange contracts are accounted for as described under Hedges above.

Commodity fixed price swap contracts: Commodity fixed price swap contracts are accounted for as described under Hedges above.

ROUNDING OF AMOUNT TO THE NEAREST \$100,000: Boral Limited is of a kind referred to in ASIC Class Order 98/100 dated 10 July 1998 and, in accordance with that Class Order, amounts in the financial report and Directors' Report have been rounded to the nearest one hundred thousand dollars unless otherwise stated.

DIVIDEND FRANKING ACCOUNT

Final prior year dividend under provided

4. DIVIDENDS

The balance of the franking account of Boral Limited as at 30 June 2002 is \$Nil after adjusting for franking credits/(debits) that will arise from:

- the payment/refund of the amount of the provision for income tax

Interim dividend of 9 cents per share, franked to 3.15 cents per share, paid 15 April 2002 (2001 paid: 17 April 2001, franked to 3.15 cents per share)
Final dividend of 10 cents per share (2001: 9 cents), franked to 7.5 cents per share, payable 19 September 2002 (2001 paid: 15 October 2001, franked to 3.15 cents per share)

- payment of dividends recognised as a liability at the current balance sheet date
- the receipt of intercompany dividends from controlled entities during the current financial year.

From 1 July 2002 the New Business Tax System (Imputation) Act 2002 requires measurement of franking credits based on the amount of income tax paid, rather than on after-tax profits. This change in the basis of measurement does not change the value of franking credits to shareholders who may be entitled to franking credit benefits.

5. EARNINGS PER SHARE

Classification of securities as ordinary shares

Only ordinary shares have been included in basic earnings per share.

Classification of securities as potential ordinary shares

Options outstanding under the Executive Share Option Plan have been classified as potential ordinary shares and are included in diluted earnings per share only.

	2002	2001
	\$ millions	\$ millions
Earnings reconciliation		
Net profit	192.8	153.7
Net profit attributable to outside equity interests	(0.4)	(0.3)
Basic and diluted earnings	192.4	153.4
Weighted average number of ordinary shares used as the denominator		
Number for basic earnings per share	571,317,538	568,050,178
Effect of executive share options on issue	2,846,806	588,300
Number for diluted earnings per share	574,164,344	568,638,478
Basic earnings per share - ordinary shares	33.7c	27.0c
Diluted earnings per share - ordinary shares	33.5c	_26.8c

Between 11 March 2002 and 8 April 2002 240,000 shares were issued upon the exercise of executive options. The diluted EPS calculation includes that portion of these options assumed to be for nil consideration, weighted with reference to the date of conversion.

VALUATIONS

The 30 June 2002 independent and directors' valuations of the consolidated entity's freehold land and buildings were carried out on the basis of either open market values for existing use or vacant possession resulted in a valuation of \$897.7 million for the consolidated entity (Boral Limited: \$82.6 million) compared to current book values of \$806.3 million (Boral Limited: \$72.6 million). As land and buildings are recorded at cost, the valuation has not been brought to account although, where the valuation demonstrated an impairment in value, the relevant asset was written down by the amount of the impairment.

12. DEFERRED TAX ASSETS

NON-CURRENT

Future income tax benefit comprises the estimated future benefit at the applicable rate of 30% in respect of the following items: Provisions and accrued employee entitlements not currently deductible Tax losses carried forward * Unrealised foreign exchange losses

Other items

Future income tax benefit not recognised:
The potential deferred tax asset in controlled entities has not been taken into account in respect of tax losses where recovery is not virtually certain *

66.6 73.8 15.1 13.2 29.4 42.6 14.7 18.1 125.8 147.7

Consolidated

210.0

211.7

- * The potential deferred tax asset will only be obtained if:
- (i) the relevant entities derive future assessable income of a nature and an amount sufficient to enable the asset to be realised, or the asset can be utilised by another company in the consolidated entity in accordance with tax law in the jurisdiction in which the company operates;
- (ii) the relevant consolidated entities continue to comply with the conditions for deductibility imposed by the law, and
- (iii) no changes in tax legislation adversely affect the relevant entities in realising the asset.

The gross amount of tax losses carried forward that have not been recognised and the range of expiry dates for recovery by tax jurisdiction are as follows:-

Tax Jurisdiction	Expiry Date	\$ millions	<u>s</u> millions
Australia	No restriction	48.0	•

FINANCE LEASES:

16. LEASE LIABILITIES

Less: Future finance charges and executory costs

The consolidated entity leases property and equipment under finance leases expiring from one to five years.

Some leases involve lease payments comprising a base amount plus an incremental contingent rental. Contingent rentals are based on the Consumer Price Index.

OPERATING LEASES:

Lease commitments in respect of operating leases are payable as follows:

Not later than one year

Later than one year but not later than five years

Later than five years

186.4	158.8

	·
3.7	3.8
5.9	3.8 9.8
	<u> </u>
9.6	13.6

The consolidated entity leases property, equipment and vehicles under operating leases expiring from one to forty years.

Leases generally provide the consolidated entity with a right of renewal at which time all terms are renegotiated.

Some leases involve lease payments comprising a base amount plus an incremental contingent rental. Contingent rentals are based on the Consumer Price Index or operating criteria.

NATURE AND PURPOSE OF RESERVES

Asset revaluation reserve

The asset revaluation reserve includes the net revaluation increments and decrements arising from previously revalued land and buildings.

This amount is not available for future write-downs as a result of using the deemed cost election for land and buildings when adopting AASB 1041.

Upon disposal of revalued assets, any revaluation increment standing to the credit of the asset revaluation reserve is transferred to retained profits.

Foreign currency translation reserve

The foreign currency translation reserve records the foreign currency differences arising from the translation of self-sustaining foreign operations, the translation of transactions that hedge the Company's net investment in a foreign operation or the translation of foreign currency monetary items forming part of the net investment in a self-sustaining operation.

21. RETAINED PROFITS

	Number	Number	Number	Number
Number of employees at year end	11,829	11,593	76	78

EXECUTIVE OPTION PLAN

As at the 30 June 2002, the following options to subscribe for shares had been granted by Boral Limited pursuant to an executive incentive scheme, the Boral Senior Executive Option Plan:

Tranche	Number of Options	Expiry Date	Exercise Price
(i)	1,160,000	11-Dec-2002	\$5.26
(ii)	30,000	2-Mar-2003	\$5.26
(iii)	720,000	4-Dec-2003	\$3.00
(iv)	130,000	19-Jan-2004	\$3.00
(v)	1,250,000	1-Feb-2004	\$4.04
(vi)	1,684,550	6-Dec-2004	\$3.18
(vii)	750,000	1-Mar-2005	\$2.28
(viii)	750,000	13-Nov-2005	\$2.28
(ix)	5,045,800	8-Dec-2005	\$1.97
(x)	3,164,900	6-Nov-2006	\$3.35

Each option entitles the holder to subscribe for one fully paid ordinary share in the capital of the Company.

Certain further details of the options granted are given in clause (9) of the Directors' Report.

The options in tranche (x) were issued during the year to 48 senior executives and the market price of Boral Limited shares at the time of issue of the options was \$3.29.

The 3,164,900 options issued during the year were each valued at \$0.579 using the Black-Scholes option-pricing formula. If these options were expensed at this value, there would have been a \$1.8 million reduction in the current year's after tax profit of the Company and the consolidated entity.

The options are only exercisable to the extent to which the exercise hurdle is satisfied.

Different exercise hurdles apply to the various tranches of options and satisfaction of these hurdles is dependent on the achievement of increases in the Boral share price, increases in the Boral Total Shareholder Return (TSR) Index (being the index measuring total shareholder return maintained by ASX) or the performance of the TSR of Boral Limited compared to the TSR of a reference group of approximately 50 listed companies or the companies from time to time comprising the ASX Top 100.

NOTES TO THE FINANCIAL STATEMENTS

Boral Limited and Controlled Entities

BORAL EXECUTIVE SHARE PLAN

Boral Limited also operates the Boral Executive Share Plan as an executive incentive scheme. The executives who participate in the Plan each year are separate from those who receive grants of options pursuant to the Boral Senior Executive Option Plan.

Each year, the Company pays to the Trustee of the Plan an amount not exceeding 1% of the consolidated operating profit after income tax and minority interests, the Trustee applies this amount to the purchase of Boral Limited shares on ASX and these shares are notionally allocated to executives being members of the Plan having regard to their performance. Subject to the terms and conditions of the Plan, the shares will be transferred to the members on the expiry of three years after allocation.

During the year, the Company's grant to the Plan was \$1.2 million and the shares purchased were allocated to 329 executives.

At 30 June 2002, 1,625,274 Boral Limited shares and 560,533 Origin Energy Limited shares were held in the Plan.

SUPERANNUATION

At 30 June 2002, there were in existence a number of Superannuation Plans in Australia and overseas established by the consolidated entity, or in which the consolidated entity participates, for the benefit of employees.

The Boral Superannuation Plan and Boral Industries Inc Pension Plans are defined benefit plans while Boral Employees Superannuation Trust is an accumulation fund.

The principal types of benefit provided for under the Plans are lump sums payable on retirement, termination, death or total disability.

Contributions to the Plans by both employees and entities in the consolidated entity are based on percentages of the salaries or wages of employees.

Entities in the consolidated entity contribute to the Plans in accordance with the governing Trust Deeds subject to certain rights to vary, suspend or terminate such contributions and thus are not legally obliged to contribute to those Plans.

The date as at which the last actuarial assessments of the abovementioned two defined benefit funds were made and the names and qualifications of the actuaries who made those assessments are:

PLAN	DATE	NAME AND QUALIFICATIONS		
Boral Superannuation Plan	30.06.01	M A Stevenson, FIA FIAA		
Boral Industries Inc Pension Plan	01.01.00	K Eric Freden, FSA		

The accrued benefits, fund assets at net market value and vested benefits of the defined benefit funds are as follows:

		Dolan		
	Boral Industries In Sup	Boral Industries In Superannuation		
	Plans	Plan	Total	
	\$'millions	\$'millions	\$'millions	
Fund assets at net market value	11.9	73.8	85.7	
Accrued benefits	11.9	80.2	92.1	
Excess/(deficit) of fund assets over accrued benefits	<u> </u>	(6.4)	(6.4)	
Vested benefits	11.8	79.1	90.9	
Excess/(deficit) of fund assets over vested benefits	0.1	(5.3)	(5.2)	
Employer contributions during the year	0.3	6.9	7.2	
Employer contributions payable/accrued as at 30 June	•			

Boral

Accrued benefits, fund assets and vested benefits have been determined based on amounts calculated by the actuary projected forward to 30 June 2002.

Based on actuarial advice, contributions to the Boral Superannuation Plan have been increased to enable the fund to eliminate the deficit over time. Taking into account these increased contributions, and based on the abovementioned actuarial assessments and the market values of assets after meeting liabilities, funds are expected to be available to satisfy all benefits that become vested under each of the major plans in the event of:

- (i) termination of the plan,
- (ii) voluntary termination of the employment of each employee on the initiative of that employee, or
- (iii) compulsory termination of the employment of each employee by an entity in the consolidated entity.

US SENIOR NOTES

US\$300 million senior unsecured note placement to institutions in the North American Private Placement market. The notes were structured in 4 tranches comprising maturities of US\$42 million for 7 years, US\$152.5 million for 10 years, US\$52.0 million for 12 years and US\$53.5 million for 15 years where fixed coupon interest rates of 6.62%, 6.91%, 7.01% and 7.11% per annum respectively apply.

US COMMERCIAL PAPER

US commercial paper facility - US\$500 million (A\$887 million) non-underwritten facility whereby issuance is conducted through a two dealer arrangement. Commercial paper is issued for periods not exceeding 365 days from the date of issue, with the applicable interest rate benchmark being agreed to between the investor and the issuer at the date notes are purchased by investors.

Euro commercial paper facility - US\$500 million (A\$887 million) or its equivalent in alternative currencies non underwritten facility whereby issuance is conducted through a two dealer arrangement. Commercial paper can be issued for periods not exceeding 365 days from the date of issue, with the applicable interest rate benchmark being referenced to the London Interbank Offerred Rates (LIBOR).

AUD SHORT TERM NOTES

Australian Dollar Domestic Short Term Note Program - A\$500 million non-underwritten facility whereby issuance by Boral Limited is conducted through a panel of four dealers. Notes can be issued for periods not exceeding 365 days from the date of issue with the applicable interest rate benchmark being referenced to the Bank Bill Swap Rate (BBSW).

AUD MEDIUM TERM NOTES

Australian Dollar Domestic Medium Term Note Program - A\$500 million non-underwritten facility whereby issuance is conducted through a panel comprising four placement agents. Medium term notes will be issued with maturities of not less than 365 days where no restriction applies concerning the maximum issue period. The applicable interest rate can either be fixed or variable which is determined between the issuer and investor at the date notes are purchased by investors.

BANK LOAN FACILITIES

Cash advances - A\$200 million cash advance facility provided by an international bank. As at 30 June 2002, A\$115 million is outstanding under this facility. The maturity of the facility is June 2004 with the applicable interest rate benchmark being referenced to BBSW.

OTHER LOAN FACILITIES

Fully drawn multi-currency bank and non bank loans are arranged for use by the consolidated entity with the general terms and conditions being set and agreed to with the respective lending entity on an activation and or annual review basis.

STANDBY NOTE ISSUANCE FACILITY

Note issuance facility - committed US\$300 million (A\$532 million) financing underwritten by a panel of international banks. This facility matures at 30 June 2005, with the applicable interest rate benchmark being based on LIBOR.

BANK OVERDRAFTS

The consolidated entity operates unsecured bank overdraft facility arrangements in Australia and the US that have combined limits of A\$25 million. The facilities within Australia are conducted on a setoff basis and all facilities are subject to variable rates of interest determined by the lending bank's benchmark interest rate. All facilities are subject to annual review where repayment can occur on demand by the lending bank.

TO LEG TO THE PRIME STATEMENTS

Boral Limited and Controlled Entities

27. FINANCIAL INSTRUMENTS

The consolidated entity is exposed to financial risk as a result of fluctuations occurring in interest/foreign exchange rates and certain commodity prices.

Accordingly, the consolidated entity uses financial instruments not recognised on the Statement of Financial Position to minimise the financial volatility these exposures create to its operating results and financial position.

(A) INTEREST RATE RISK

The consolidated entity enters into interest rate swap and option transactions with the purpose of controlling the interest cost of funding associated with external debt raised.

Implementation of interest rate swap and option instruments allows the consolidated entity the flexibility to raise term borrowings at fixed or variable interest rates and subsequently these borrowings can be effectively converted to either variable interest rates or locked into fixed interest rates to remove the interest cost uncertainty.

The maturity profile of existing swap transactions is principally between two and ten years and, in accordance with financial market convention, each swap requires a quarterly or semi-annual payment (fixed/variable) of interest and a corresponding receipt of (variable/fixed) interest. The swap contract allows settlement to occur on the basis that either a net amount of interest is payable by or receivable to the consolidated entity. At 30 June 2002, fixed rates applicable to the consolidated entity's multicurrency interest rate swap portfolio range between 4.5% and 10.3% (weighted average 5.34%) which compares with a range of 1.9% to 4.9% using floating rates referenced against 90 day LIBOR and BBSW at balance date (weighted average 3.6%).

An interest rate cap was purchased giving the right but not the obligation to convert US\$25m of floating interest rate debt to a fixed rate of 6.90% per annum. The expiry date on the cap is April 2003 and at the 30 June 2002 the rights available under the cap had not been exercised as market rates were below the fixed rate of 6.90% per annum.

The following tables provide the consolidated entity's exposure to interest rate risk and the weighted average interest rate for the various categories of financial assets and financial liabilities existing at balance date.

30 June 2002 - Consolidated		Fixed	interest matu	ring in:		=

Boral Limited and Controlled Entities

27. FINANCIAL INSTRUMENTS (continued)

(B) FOREIGN EXCHANGE RISK

The consolidated entity is exposed to foreign currency exchange risk. This occurs as a result of firstly, the purchase of materials, some plant and equipment and the sale of products for amounts denominated in foreign currencies, secondly, the translation of its investment in overseas domiciled operations and thirdly, interest expense related to certain non-AUD denominated borrowings.

In order to mitigate the economic volatility caused by fluctuations in foreign currency rates, the consolidated entity enters into foreign exchange forward contracts to hedge certain firm purchase and sale commitments denominated in foreign currencies. Additionally foreign currency denominated borrowings and forward rate agreements are used to hedge its investment in overseas operations.

At balance date the consolidated entity has the following contracts outstanding which are required to hedge the foreign exchange exposures outlined in the above paragraphs.

30 June - Consolidated					
Foreign currency forward contracts					
Buy AUD/Sell USD *					
Buy USD/Sell AUD*

^{*} Foreign currency forward contract are utilised to hedge Boral's US domiciled operations. Accordingly periodical foreign currency revaluation gains or losses are brought to account through the Foreign Currency Translation Reserve

(C) COMMODITY PRICE RISK

30 June - Consolidated

The consolidated entity has exposure to fluctuations in oil based and aluminium product commodity prices. This exposure results from the consolidated entity's business activities associated with construction materials and windows fabrication. In order to reduce the adverse financial effects caused by unfavourable price movements fixed rate price swaps are utilised to mitigate this risk.

Boral Limited and Controlled Entities

27. FINANCIAL INSTRUMENTS (continued)

(D) CREDIT RISK

Credit risk represents the loss that would be incurred if counterparties to financial transactions fail to fulfil their obligations as contracted at maturity. The consolidated entity minimises its exposure to credit risk through the adoption of counterparty credit limits which are determined in accordance with international credit ratings. At balance date, the consolidated entity has no significant concentration of credit risk with any single counterparty.

Recognised financial instruments

The credit risk relating to financial assets of the consolidated entity which are recognised on the balance sheet is the carrying amount net of any provision for doubtful debts.

Unrecognised financial instruments

Credit risk relating to off balance sheet derivative contracts is minimised through using internationally recognised financial intermediaries, where the exposure limit applicable to each respective counterparty is determined with reference to the credit rating assigned by the international rating agencies. The policy of the consolidated entity generally requires that financial transactions are only entered into with institutions having an A-/A3 or greater long term international credit rating. Credit exposures relating to foreign currency, commodity and interest rate derivatives are represented by the positive net fair value position of the contracts, as disclosed, subject to the counter-parties performing as contracted.

(E) NET FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

Net fair values of financial assets and liabilities are determined by the consolidated entity using the following criteria:

Recognised financial instruments

Monetary financial assets and financial liabilities not readily traded in an organised financial market are determined by valuing them at the present value of contractual future cash flows on amounts due from customers or due to suppliers. The carrying amounts applicable to bank term deposits, accounts receivable, accounts payable, bank loans and dividend payable approximate net fair value.

Unrecognised financial instruments

The valuation of off-balance sheet financial instruments detailed in this note reflects the estimated amounts which the consolidated entity expects to pay or receive to terminate the contracts (net of transaction costs) or replace the contracts at their current market rates as at the balance date. This is determined using independent market quotations and adopting conventional market valuation techniques.

NOTES TO THE FINANCIAL STATEMENTS

Boral Limited and Controlled Entities

28. REMUNERATION OF EXECUTIVES

The remuneration of executives who work wholly or mainly outside Australia is not included in this disclosure. Executive officers are those officers who have a direct involvement in the management of strategic direction, general management or control at an operating divisional level.

The number of executive officers of the Company and of controlled entities, whose remuneration from the Company or related parties, and from entities in the consolidated entity, falls within the following bands:

	Consolida	ted	Boral Lim	ited		Consoli	dated	Boral Lir	nited

The number of executive officers of the Company and controlled entities for the year ended 2002 includes 3 executives who ceased employment during that year. The number of executive positions as at 30 June 2002 was 41. The total income received in 2002 includes termination payments, which were consistent with their entitlements and market practice, to those officers who ceased employment during 2002.

The emoluments disclosed in the Director's Report differ due to the inclusion of the value of shares and options by virtue of the differing requirements of the Corporations Act 2001 and the Accounting Standards.

Entered into a cross guarantee with Boral Limited (refer note 35).

>New entrant to the cross guarantee with Boral Limited during the year (refer note 35).

^{*}Granted relief by the Australian Securities and Investments Commission from specified accounting requirements in accordance with a Class Order.

All the shares held by Boral Limited in controlled entities are ordinary shares other than those indicated by symbol above.

Boral Limited and Controlled Entities

33. RELATED PARTY DISCLOSURES

Controlled entities

Interests held in controlled entities are set out in note 32.

Partly owned controlled entities

Details of interests in partly owned controlled entities are also set out in note 32.

During the year, the Company entered into transactions with certain of these entities primarily involving loans to the Company which were conducted on the same terms and conditions as loans from wholly owned controlled entities. All other transactions are in the ordinary course of business and on normal terms and conditions.

Associated entities

Interests held in associated entities are set out in note 8. The business activities of a number of these entities are conducted under joint venture arrangements. Associated entities conduct business transactions with various controlled entities. Such transactions and resulting year end balances, which are immaterial in amount, include purchases and sales of certain products, dividends and interest. All such transactions are conducted on the basis of normal commercial terms and conditions.

Directors

The following persons held the position of Director of Boral Limited during the financial year:

EA Alexander

EJ Cloney

RT Halstead

KJ Moss

RT Pearse

MR Rayner

JR Williams

Remuneration received or receivable by Directors of each entity in the consolidated entity and aggregate amounts paid in connection with the retirement of Directors and executive officers of entities in the consolidated entity are disclosed in note 29.

Boral Limited in general meeting has resolved that the total amount of Directors' fees payable to the Directors by the Company and its controlled entities should not exceed \$650,000 per annum. The non-executive Directors have entered agreements with Boral Limited providing for benefits to be paid on their retirement or death. The agreements are in accordance with an authority for Boral Limited to enter such agreements given in general meeting.

	Consolidated	l	Boral Limited	l
	2002	2001	2002	2001
	\$'000	\$ 000	\$'000	\$'000
Loans made to Directors: Aggregate amount of Employee Share Plan loans made to executive directors of controlled entities during the year:	20	2	5	•
No loans other than Employee Share Plan loans were made to executive Directors of controlled entities and no loans were made to executive or non-executive Directors of Boral Limited during the financial year.				
Aggregate amount of outstanding loans to executive Directors (there are no outstanding loans to non-executive Directors)	16	3	4	1
Loan repayment from Directors: Aggregate amount of Employee Share Plan loan repayments				/
received from executive Directors	5	4	1	1

Employee Share Plan loans are interest free.

The names of executive Directors of controlled entities who made loan repayments during the financial year were:

R Angus, M Barry, R Batstone, P Boyd, S Brady, T Brennan, G Burton, T Charnock, C Condo, D Cook, A Dagger, W Davison, R Deavin, J Dignam, D Eagleson, G Faber, N Hopper, D Irvine, P Jobe, A Laube, J Lemoine, J Malempre, S Moore, R Parkes, P Pulis, M Scobie, E Severin, P Sidney, S Taylor, R Town, R Wheatley, D Young.

Boral Limited and Controlled Entities

33. RELATED PARTY DISCLOSURES (continued)

Other transactions

Transactions entered into during the year with Directors of Boral Limited and controlled entities which are within normal employee, customer or supplier relationships on terms and conditions not more favourable than dealings in the same circumstances on an arm's length basis include:

- * the receipt of dividends from Boral Limited
- * participation in the Employee Share Plan, the Executive Share Plan and the Senior Executive Option Plan
- * terms and conditions of employment
- * reimbursement of expenses
- * purchases of goods and services.

Certain non-executive Directors of Boral Limited are associated with legal or accounting firms which derive fees for work done for Boral Limited and controlled entities.

Mr R T Halstead is a partner of Clayton Utz, Solicitors. During the financial year, Boral Limited and controlled entities paid fees of \$0.987million (2001: \$0.334 million) to Clayton Utz for legal work done on terms and conditions no more favourable than those available on similar transactions on an arms length basis.

For part of the year, Ms E A Alexander was a partner of PricewaterhouseCoopers, Accountants. During the financial year, Boral Limited and controlled entities paid fees of \$2.333 million (2001: \$2.306 million) to PricewaterhouseCoopers for consultancy work done (including internal audit services) on terms and conditions no more favourable than those available on similar transactions on an arm's length basis.

Dr K J Moss is a director and, for part of the year, Mr M R Rayner was a director of National Australia Bank Limited. Dr Moss and Mr Rayner are directors of Boral Limited. During the year, Boral Limited received banking and financial services from National Australia Bank Limited on terms and conditions no more favourable that those available on an arm's length basis.

Dr Moss is also a director of Centennial Coal Company Limited. During the year, controlled entities of Centennial Coal Company Limited, of which Dr K J Moss is the Chairman, supplied coal to the Boral Limited Group's Berrima and Maldon cement works to the value of \$8.330 million (2001: \$6.852 million). The Boral Limited Group supplied electrical power to the value of \$0.172 million (2001: \$0.152 million) to a controlled entity of Centennial Coal Company Limited which also paid \$0.024 million (2001: \$0.028 million) to the Boral Limited Group for council rates and land tax. These transactions were conducted in accordance with the terms and conditions of a supply contract for the Berrima Cement Works and a commercial lease agreement that had been negotiated on an arm's length basis in 1994 in conjunction with the sale of the Boral Limited Group's coal operations to controlled entities of Centennial Coal Company Limited. The supply of coal to the Maldon cement works was added to the supply contract in 1999.

Southern Highland Quarries Pty Limited, a company in which Mr W Malcolm, a Director of Concrite Pty Limited, a controlled entity, is interested, supplied aggregates to the value of \$0.499 million to Concrite Pty Limited during the financial year. The product was supplied within a normal customer and supplier relationship on terms and conditions no more favourable than those available on similar transactions on an arm's length basis.

During the year, the aggregate number of shares acquired by directors and their director-related entities totalled 184,088 (2001: 72,008), while no shares were disposed of by directors and their director-related entities.

Particulars of options granted by Boral Limited to Mr RT Pearse, the Managing Director of Boral Limited, to subscribe for fully paid ordinary shares in the capital of Boral Limited are given in clause (13) of the Directors' Report.

Directors' Declaration

- 1. In the opinion of the Directors of Boral Limited:
 - (a) the financial statements and notes, as set out on pages 1 to 39, are in accordance with the Corporations Act 2001, including:
 - (i) giving a true and fair view of the financial position of the Company and its consolidated entities as at 30 June 2002 and of their performance, as represented by the results of their operations and their cash flows, for the year ended on that date; and
 - (ii) complying with Accounting Standards and the Corporations Regulations 2001; and
 - (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
- 2. There are reasonable grounds to believe that the Company and the subsidiaries identified in Note 35 will be able to meet any obligations or liabilities to which they are or may become subject by virtue of the Deed of Cross Guarantee between the Company and those subsidiaries pursuant to ASIC Class Order 98/1418.

Signed in accordance with a resolution of the Directors:

Kenneth J. Moss, Director

Rodney T. Pearse, Director

Sydney J August 2002

Independent audit report to the members of Boral Limited

Scope

We have audited the financial report of Boral Limited ("the Company") for the financial year ended 30 June 2002, consisting of the statements of financial performance, statements of financial position, statements of cash flows, accompanying notes 1 to 35, and the directors' declaration set out on pages 1 to 40. The financial report includes the consolidated financial statements of the consolidated entity, comprising the Company and the entities it controlled at the end of the year or from time to time during the financial year. The Company's directors are responsible for the financial report. We have conducted an independent audit of this financial report in order to express an opinion on it to the members of the Company.

Our audit has been conducted in accordance with Australian Auditing Standards to provide reasonable assurance whether the financial report is free of material misstatement. Our procedures included examination, on a test basis, of evidence supporting the amounts and other disclosures in the financial report, and the evaluation of accounting policies and significant accounting estimates. These procedures have been undertaken to form an opinion whether, in all material respects, the financial report is presented fairly in accordance with Accounting Standards and other mandatory professional reporting requirements in Australia and statutory requirements so as to present a view which is consistent with our understanding of the Company's and the consolidated entity's financial position, and performance as represented by the results of their operations and their cash flows.

The audit opinion expressed in this report has been formed on the above basis.

Audit opinion

In our opinion, the financial report of Boral Limited is in accordance with:

- (a) the Corporations Act 2001, including:
 - (i) giving a true and fair view of the Company's and consolidated entity's financial position as at 30 June 2002 and of their performance for the year ended on that date; and
 - (ii) complying with Accounting Standards in Australia and the Corporations Regulations 2001; and
- (b) other mandatory professional reporting requirements in Australia.

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

BORAL LIMITED AND CONTROLLED ENTITIES

NOTE 1 - BASIS OF PREPARATION OF CONCISE FINANCIAL REPORT

The concise financial report has been prepared in accordance with the Corporations Act 2001, Accounting Standard AASB 1039 Concise Financial Reports and applicable Urgent Issues Group Consensus Views. The financial statements and specific disclosures required by AASB 1039 have been derived from the consolidated entity's full financial report for the financial year. Other information included in the concise financial report is consistent with the consolidated entity's full financial report. The concise financial report does not, and cannot be expected to, provide as full an understanding of the financial performance, financial position and financing and investing activities of the consolidated entity as the full financial report. It has been prepared on the historical cost accounting basis.

The accounting policies have been consistently applied by each entity in the consolidated entity and, except where there is a change in accounting policy, as set out in note 3, are consistent with those of the previous year.

A full description of the accounting policies adopted by the consolidated entity may be found in the consolidated entity's full financial report.

NOTE 2 - RECLASSIFICATION OF FINANCIAL INFORMATION

To ensure comparability with the current reporting period, certain comparative items have been reclassified in the financial statements. Significant changes in disclosure relate to provisions for asset impairment being disclosed against the assets to which they relate, consistent with the approach required by AASB 1044 Provisions, Contingent Liabilities and Contingent Assets.

NOTE 3 - CHANGE IN ACCOUNTING POLICY

Segment reporting: The consolidated entity has applied the revised AASB 1005 Segment Reporting (issued in August 2000) for the first time from 1 July 2001. Individual business segments have been identified on the basis of grouping individual products or services subject to similar risks and returns. The new segments reported are: Construction Materials, Building Products, USA, Asia. Comparative information has been restated for the changes in definitions of segment revenues and results. There is no financial effect on the group as a result of these changes.

Earnings per share: The consolidated entity has applied AASB 1027 Earnings Per Share (issued in June 2001) for the first time from 1 July 2001. Basic and diluted earnings per share ("EPS") for the comparative period ended 30 June 2001 has been adjusted so that the basis of calculation used is consistent with that of the current period.

Basic EPS earnings are now calculated as net profit or loss, rather than excluding extraordinary items.

Diluted EPS earnings are now calculated by only adjusting the basic EPS earnings for the after tax effect of financing costs and the effect of conversion to ordinary shares associated with dilutive potential ordinary shares, rather than including the notional earnings on the funds that would have been received had the potential ordinary shares been converted. The diluted EPS weighted average number of ordinary shares now includes the number of shares assumed to be issued for no consideration in relation to the dilutive potential ordinary shares, rather than the total number of dilutive potential ordinary shares. The number of ordinary shares assumed to be issued for no consideration represents the difference between the number that would have been issued at the exercise price and the number that would have been issued at the average market price. The identification of dilutive potential ordinary shares is now based on net profit or loss from continuing ordinary operations, not net profit or loss before extraordinary items and is applied on a cumulative basis, taking into account the incremental earnings and incremental number of shares for each series of potential ordinary share. There is no material impact on the group as a result of applying this standard.

Final prior year dividend under provided Interim dividend of 9 cents per share, franked to 3.15 cents per share, paid 15 April 2002 (2001 paid: 17 April 2001, franked to 3.15 cents per share) Final dividend of 10 cents per share (2001: 9 cents), franked to 7.5 cents per share, payable 19 September 2002 (2001 paid: 15 October 2001, franked to 3.15 cents per share)

51.1
51.1
102.2

DIVIDEND FRANKING ACCOUNT

The balance of the franking account of Boral Limited as at 30 June 2002 is \$Nil after adjusting for franking credits/(debits) that will arise from:

- the payment/refund of the amount of the provision for income tax
- payment of dividends recognised as a liability at the current balance sheet date
- the receipt of intercompany dividends from controlled entities during the current financial year.

From 1 July 2002 the New Business Tax System (Imputation) Act 2002 requires measurement of franking credits based on the amount of income tax paid, rather than on after-tax profits. This change in the basis of measurement does not change the value of franking credits to shareholders who may be entitled to franking credit benefits.

Boral Limited has given to its bankers letters of responsibility in respect of accommodation provided from time to time by the banks to controlled entities.

A number of sites within the Boral Group have been identified as contaminated, generally as a result of prior activities conducted at the sites, and review and appropriate implementation of clean-up requirements for these is ongoing. For sites where the requirements can be assessed estimated clean-up costs have been expensed or provided for. For some sites, the requirements cannot be accurately assessed at this stage.

Certain entities within the consolidated entity are subject to various lawsuits and claims in the ordinary course of business.

Any liabilities arising from such lawsuits and claims, other than those which are already provided for in the statement of financial position, would not have a material adverse effect on the consolidated financial statements.

of Financial Results

Statement of Financial Performance

The Group's revenue from operating activities increased by 6% over the previous year to \$3,489 million. This growth reflects a relatively weak first half with a marked improvement in the second half due to increased Australian housing activity.

EBIT for the year (before profit/ loss on disposal of businesses) increased by 31% over the previous year to \$343.2 million. The major features of the full year profit result were:

- Australian operations profits up 27% to \$228.0 million.
- Equity accounted profits of \$44.7 million , underpinned by a \$17.8 million profit from the Plasterboard Asian joint venture.
- A \$28 million from Quarry End Use activities, predominantly from the Greystanes development.
- Strong earnings of A\$109.7 million from the US operations which were 10.5% ahead of last year despite uncertain economic conditions.

Net interest expense reduced from \$69.7 million to \$63.2 million for the year reflecting reduced interest rates and lower debt levels.

EBIT interest cover improved from 4.3 to 5.4 times during the year.

Profit after tax of \$192.4 million improved by 25% (51% when profits from sale of businesses in the previous year are excluded) over the prior year, with over \$100 million being delivered in the second six month period.

A final dividend of 10.0 cents per share has been declared which will be 75% franked. This represents an increase from the 2001 final and 2002 interim dividends which were both 9.0 cent dividends franked at 35%.

Dividend distributed to shareholders totalled \$109.2 million and represent a payout ratio of 57% of profit after tax.

Earnings per share increased by 25% to 33.7 cents per share.

Statement of Financial Position

The net financial position of the Group strengthened during the period. Net borrowings reduced from \$982.8 million to \$881.1 million reflecting strong business cashflows. The Groups gearing (net debt to equity) reduced from 53% to 45%, despite substantial acquisition expenditure during the year and remains well within the targeted gearing range of 40% to 60%.

Boral's credit rating continued at BBB+/A2 by Standard and Poor's and Baa1/P2 by Moody's Investors.

At 30 June 2002 the Group had available undrawn committed and uncommitted debt facilities of \$3,151 million. During the year Boral successfully completed a US\$300 million unsecured note placement with an average tenure of 11.6 years. Boral's average debt maturity profile increased from 3.1 to 6.9 years.

Total equity increased by 5.1% to \$1,949.7 million at 30 June 2002, whilst net tangible assets increased to \$1,739.7 million from \$1,642.8 million in the prior year.

The return on shareholders funds rose from 8.3% to 9.9% during the period.

Cashflow

The Group generated operating cashflows of \$392.0 million after payment of interest and income tax. This represents a 64% improvement on the operating cashflow of \$239.4 million reported last year. The improvement in operating cashflow reflects strong business unit performance, combined with lower tax payments.

These strong cashflows were used to fund around \$300 million of capital and acquisition expenditure. This included funding of a further investment in the Plasterboard Asian joint venture, which took Boral's ownership from 43.0% to 47.7% and the 100 % acquisition of the Concrite Group of companies in NSW.

Directors' Declaration

In the opinion of the Directors of Boral Limited, the accompanying concise financial report of the consolidated entity, comprising Boral Limited and its controlled entities, for the year ended 30 June 2002 set out on pages 1 to 10:

- (a) has been derived from or is consistent with the full financial report for the financial year; and
- (b) complies with Accounting Standard AASB 1039 "Concise Financial Reports".

Signed in accordance with a resolution of the Directors:

Kenneth J. Moss, Director

Rodney T. Pearse, Director

Sydney, 28 August 2002

Independent audit report on concise financial report to the members of Boral Limited

Scope

We have audited the concise financial report of Boral Limited and its controlled entities for the financial year ended 30 June 2002, consisting of the statement of financial performance, statement of financial position, statement of cash flows, accompanying notes 1 to 10, and the accompanying discussion and analysis on the statement of financial performance, statement of financial position and statement of cash flows set out on pages 1 to 10 in order to express an opinion on it to the members of the Boral Limited. The Company's directors are responsible for the concise financial report.

Our audit has been conducted in accordance with Australian Auditing Standards to provide reasonable assurance whether the concise financial report is free of material misstatement. We have also performed an independent audit of the full financial report of Boral Limited and its controlled entities for the year ended 30 June 2002. Our audit report on the full financial report was signed on Raugust 2002, and was not subject to any qualification.

Our procedures in respect of the audit of the concise financial report included testing that the information in the concise financial report is consistent with the full financial report and examination, on a test basis, of evidence supporting the amounts, discussion and analysis, and other disclosures which were not directly derived from the full financial report. These procedures have been undertaken to form an opinion whether, in all material respects, the concise financial report is presented fairly in accordance with Accounting Standard AASB 1039 "Concise Financial Reports" issued in Australia.

The audit opinion expressed in this report has been formed on the above basis.

Audit opinion

In our opinion the concise financial report of Boral Limited and its controlled entities for the year ended 30 June 2002 complies with AASB 1039 "Concise Financial Reports" issued in Australia.

DIRECTORS' REPORT

The Directors of Boral Limited ("the Company") present this report on the consolidated entity, being the Company and its controlled entities ("Boral"), for the financial year ended 30 June 2002:

(1) Review of Operations

The Directors review the operations during the year of Boral and the results of those operations as stated in the attached Results Announcement.

(2) State of Affairs

There were no significant changes in Boral's state of affairs during the year.

(3) Principal Activities and Changes

Boral's principal activities are the manufacture and supply of building and construction materials and are referred to in greater detail in the attached Results Announcement. There were no significant changes in the nature of those activities during the year.

(4) Events After End of Financial Year

There are no matters or circumstances that have arisen since the end of the year that have significantly affected, or may significantly affect:

- (a) Boral's operations in future financial years; or
- (b) the results of those operations in future financial years; or
- (c) Boral's state of affairs in future financial years.

(5) Future Developments and Results

Other than matters referred to under the heading "Outlook" in the attached Results Announcement, the Directors have no reference to make to likely developments in Boral's operations in future financial years and the expected results of those operations.

(6) Environmental Performance

Details of Boral's performance in relation to environmental regulation are set out as attached.

nds paid to members during the year were.	Total Dividend \$'000
the final dividend of 9 cents per ordinary share (franked to 3.15 cents per share at the 30% corporate tax rate) for the year ended 30 June 2001 was paid on 15 October 2001	51,128
the interim dividend of 9 cents per ordinary share (franked to 3.15 cents per share at the 30% corporate tax rate) for the year was paid on 15 April 2002	51,462

The final dividend of 10 cents per ordinary share (franked to 7.5 cents per share at the 30% corporate tax rate) for the year has been declared by the Directors and will be paid on 19 September 2002.

(8) Names of Directors

The names of persons who have been Directors of the Company during or since the end of the year are:

Elizabeth A. Alexander E. John Cloney Rodney T. Halstead Kenneth J. Moss Rodney T. Pearse Mark R. Rayner J. Roland Williams

All of these persons have been Directors at all times during and since the end of the year.

(9) Options Details of options that are granted over unissued shares of the Company are:-

Tranche .	Number of Options	Expiry Date	Exercise Price
(i)	1,160,000	11 December 2002	\$5.26
(ii)	30,000	2 March 2003	\$5.26
(iii)	720,000	4 December 2003	\$3.00
(iv)	130,000	19 January 2004	\$3.00
(v)	1,250,000	1 February 2004	\$4.04
(vi)	1,684,550	6 December 2004	\$3.18
(vii)	750,000	1 March 2005	\$2.28
(viii)	750,000	13 November 2005	\$2.28
(ix)	5,045,800	8 December 2005	\$1.97
(x)	3,164,900	6 November 2006	\$3.35

Plan. Details of options in that tranche granted to Mr. R.T. Pearse, the Managing Director, and the five most highly remunerated officers of the Company as part of their emoluments for the year are shown in the tables accompanying paragraph (14). The grant of options to Mr. Pearse was approved by shareholders at the Company's annual general meeting held on 29 October 2001. In regard to these options:-

- subject to the Rules of the Plan, the options are exercisable at any time after the third anniversary of grant and prior to the fifth anniversary of grant.
- the options will only be exercisable to the extent to which an exercise hurdle is satisfied. Whether the exercise hurdle is satisfied is measured by comparing the Total Shareholder Return ("TSR") of the Company to the TSR of the companies from time to time comprising the Australian Stock Exchange Limited (ASX) Top 100 during the exercise period of the options. The percentage of the options which may be exercised following such comparison is determined by the following sliding scale:

If at any time during the period during the exercise period of the options, the TSR of the Company:	The percentage of options which become exercisable is:
Does not reach the 50th percentile of the TSR of the ASX Top 100	0%
Reaches the 50th percentile of the TSR of the ASX Top 100	50% *
Reaches or exceeds the 75th percentile of the TSR of the ASX Top 100	100%

- * The percentage of options which become exercisable increases from the 50th percentile up to the 75th percentile by 2% for each 1% increase in the percentile TSR performance of the Company.
- for the purposes of the above, determination of the TSR of the Company relative to the TSR of the companies from time to time comprising the ASX Top 100 will be made on the basis of movements in share price and dividends and calculated in a similar manner to the Accumulation Index of ASX.

Each option entitles the holder to subscribe for one fully paid share in the capital of the Company. Optionholders have no rights under any options to participate in any share issue or interest issue of any body corporate other than the Company. During the year, 240,000 fully paid shares in the capital of the Company were issued at the price of \$3.00 each as a result of the exercise of options previously in tranches (iii) and (iv) and since the end of the year, 15,000 such shares have been issued at a price of \$3.00 each as a result of the exercise of options previously in tranche (iii) and 18,650 such shares have been issued at a price of \$3.18 each as a result of the exercise of options previously in tranche (vi). No unissued shares and interests of the Company or any controlled entity are under option other than as set out in this clause.

Street, Sydney, NSW and the register may be inspected free of charge.

(10) Indemnities and Insurance for Officers and Auditors

During or since the end of the year, Boral has not given any indemnity to a current or former officer or auditor against a liability or made any agreement under which an officer or auditor may be given any indemnity of the kind covered by sub-section 199A(2) or (3) of the Corporations Act 2001.

During the year, Boral paid premiums in respect of Directors' and Officers' Liability and Legal Expenses insurance contracts for the year ended 30 June 2002 and since the end of the year, Boral has paid, or agreed to pay, premiums in respect of such contracts for the year ending 30 June 2003. The insurance contracts insure against certain liability (subject to exclusions) persons who are or have been directors or officers of the Company and controlled entities. A condition of the contracts is that the nature of the liability indemnified and the premium payable not be disclosed.

(11) Directors' Qualifications, Experience and Special Responsibilities Each Director's qualifications, experience and special responsibilities are set out as attached.

(12) Meetings of Directors

The number of Meetings of the Board of Directors and each Board Committee held during the year and each Director's attendance at those Meetings was:

	Board o		Audit Committ	ee	Compen Commit	
	Meetings held while a Director	Meetings Attended	Meetings held while a Member	Meetings Attended	Meetings held while a Member	Meetings Attended
E.A. Alexander	12	11	7	7	-	_
E.J. Cloney	12	11	-	-	3	3
R.T. Halstead	12	12	7	7	-	-
K.J. Moss	12	12	-	-	3	3
R.T. Pearse	12	12	-	-	-	· _
M.R. Rayner	12	12	-	-	3	3
J.R. Williams	12	12	7	6	-	-

Mr. Pearse, the Managing Director, is not a member of the Audit and Compensation Committees but attended the Meetings held by the Audit Committee and two of the three Meetings held by the Compensation Committee.

(13) Directors' Shareholdings

Details of each Director's interests in the shares and other securities of the Company are:

	Shares	Executive Share Plan	Options
E.A. Alexander	12,374	-	-
E.J. Cloney	14,158	•	
R.T. Halstead	11,544	-	-
K.J. Moss	21,000	· -	-
R.T. Pearse	236,753	9,712 a	b
M.R. Rayner	20,000	· -	
J.R. Williams	15,803	-	-

The shares are held in the name of the Director except in the case of Mr. E.J. Cloney, 534 shares are held by Lizzey Investments Pty. Limited and 12,500 shares are held by the Cloney Superannuation Fund, in the case of Dr. K.J. Moss, 21,000 shares are held by K.J. and G.A. Moss and in the case of Mr. M.R. Rayner, 19,000 shares are held by Mokanger Personal Superannuation Fund.

Shares or other securities with rights of conversion to equity in the Company or in a related body corporate are not otherwise held by any Directors of the Company. There were no disposals of such securities by any Directors or their Director-related entities during the financial year.

- a Shares in the Company allocated to Mr. Pearse's account in the Executive Share Plan. He will only be entitled to a transfer of those shares in accordance with the terms and conditions of the Plan.
- b Options held by Mr. Pearse are:-

Number of Options	Expiry Date	Exercise Price
50,000	11 December 2002	\$5.26
50,000	4 December 2003	\$3.00
71,500	6 December 2004	\$3.18
750,000	1 March 2005	\$2.28
750,000	13 November 2005	\$2.28
700,000	6 November 2006	\$3.35

(14) Emoluments of Directors and Officers

The broad policy for determining the nature and amount of emoluments of Directors and senior Boral executives is described as attached.

Details of the nature and amount of each element of the emoluments of each Director and each of the five named officers of Boral receiving the highest emoluments are set out in the attached tables. nearest one hundred thousand dollars unless otherwise indicated.

Signed in accordance with a resolution of the Directors.

Kenneth J. Moss, Director

Rodney T. Pearse, Director

MEDIA RELEASE

Results announcement for the year ended 30 June 2002

21 August 2002

ABN 13 008 421 761

Level 39, AMP Centre 50 Bridge Street, Sydney GPO Box 910, Sydney NSW 2001 Telephone (02) 9220 6300 Facsimile (02) 9223 6605

BORAL'S UNDERLYING PROFIT INCREASES BY 51% TO \$192M

Boral Limited today announced a net profit after tax and minorities of \$192.4 million for the year ended 30 June 2002, a 51% increase in underlying profit on prior year (the 2001 result included a net \$26 million profit from disposal of businesses).

Earnings per share for the year increased from 27 cents to 34 cents.

Sales revenue of \$3.5 billion was 6% above the prior year, driven by a cyclical recovery in Australian housing, resilience in the US housing market and continued growth in Asian markets.

The major features for the full year profit result were:

- o A \$48 million improvement in Australian EBIT to \$228 million driven by volume uplifts in housing, pricing initiatives in construction materials in the second half and operational improvements.
- An \$18 million profit from Boral's 48% interest in the Asian Plasterboard joint venture, which was \$15 million above last year's result.
- Strong earnings of A\$110 million from US operations (up 10%).
- A 31% improvement in underlying EBIT to \$343.2 million; overall EBIT to sales margin improved to 9.8% compared with 8.0% in the prior year.
- \$7 million (9%) lower interest costs through lower interest rates and reduced debt.
- Average tax rate reduced from 34% to 31% due to lower Australian corporate tax rates and a favourable tax environment for the Asian Plasterboard JV.

Sales revenue for the June-2002 half year of \$1.8 billion was 8% above the June-2001 half. A strong second half profit after tax of \$100 million, in what is traditionally the weaker half of the year, was \$45 million ahead of the June half of FY2001. Second half EBIT to sales margin of 10.4% was a significant improvement on 6.7% for the June 2001 half-year.

Operational cashflows of \$392 million were 64% above the \$239 million reported last year. Operating cashflow more than covered capital and acquisition expenditure of \$302 million during the period. Surplus cashflow was used to reduce debt from \$983 million to \$881 million enabling gearing (D/E) to reduce to 45% from 53% at June 2001, which is comfortably within Boral's targeted gearing range of 40 to 60%.

A final dividend of 10.0 cents per share has been declared, 11% higher than the interim dividend and final dividend last year. The dividend will be 75% franked, an increase from the 35% franking level for the interim dividend. The dividend will be paid on 19 September 2002, 26 days earlier than last year.

MAINCEL COMPINOMS

The estimated total value of work done in Australian building and construction markets increased by more than 11% during the period due to an uplift in housing activity¹.

In Australia, the rapidity and extent of the recovery in the housing market, which drives approximately one third of Boral's revenues, was better than expected and was supported by a low interest rate environment and the Government's First Home Owners Grant. Housing approvals increased by a significant 42% compared with the prior year. This improvement however, has taken up to six months to flow through into housing activity, with the estimated value of work done in housing (as estimated by BIS Shrapnel) increasing by approximately 21% over the same period¹.

Difficulties in obtaining home warranty insurance delayed housing starts, particularly in NSW, which is Boral's largest Australian market.

The Australian non-dwelling construction market segment, which drives 15-20% of Boral's revenues, was 4% up year on year. Conversely, construction activity in the roads, highways, subdivision & bridges segment, which determines a further 15-20% of Boral's revenue, was approximately 5% below last year; there are however, positive indications of emerging major project work. Both the engineering & construction and non-dwelling markets remain at low levels compared with the FY1999 cycle peak.

Five years ago approximately 20% of Boral's revenues were from offshore operations. This year around 30-35% of total revenues were derived from the USA and Asia, if Boral's notional share of joint venture revenues is included.

In the USA, housing activity remained resilient despite uncertainties emerging after September 11 and a weak US economy. The decline in activity post-September 11 was offset by a milder winter compared with the severe winter in the prior year. This resulted in overall US housing starts being up 4% year-on-year.

Strong market growth in Asia continued during the period. New construction ahead of the FIFA World Cup in June 2002 boosted the strong underlying growth being experienced in South Korea but some sign of softening is being seen following the event. Conditions in Thailand were favourable with stronger housing likely to underpin activity. Indonesia also lifted albeit coming off very low levels following the 1997 "Asian crash". Market volumes in China grew in the period but the market remains a difficult one.

DELIVERING A PERFORM AND GROW STRATEGY

Boral's Strategic Intent as announced in October 1999, is to be a value-driven, focused building and construction materials supplier, operating in Australia and increasingly offshore. Our strategy is to lift the performance of Boral's portfolio of businesses and to grow around our leading reserve and market positions.

Performance enhancement

As a result of Performance Enhancement Programs (PEP), Boral achieved \$112 million of operational improvement and overhead cost savings during the period. These PEP cost savings more than offset inflationary business cost escalations during the year.

Compared with the prior year, average prices strengthened in timber, masonry, bricks (WA), quarries, cement and in bricks/tiles in the USA. However, during the period average pricing levels declined in Australian plasterboard, bricks (east coast) and roof tiles. Based on ABS

¹ Fourth quarter value of work done data is not yet available from Australian Bureau of Statistics.

declined by 0.1%, yet increased 10.4% from the March-02 quarter to the June-02 quarter.

Boral's pre-mix concrete selling prices reflect this trend and have increased by more than 10% from April 2002.

Following the divestment of the profitable upstream Windows lineals and extrusion operations in 2001, this year's result reflects a favourable \$10 million turnaround of the Windows fabrication business. This year, the business was profitable as a result of a lower asset base and overhead cost structure, a streamlined product range and reduced operational costs.

A considerable turnaround in performance in the Timber portfolio has also been achieved following divestment of the profitable Tasmanian timber business in 2000 and the Tumbarumba softwood mill in 2001. With significantly reduced assets, the profitability of all remaining business units – hardwoods, softwoods, plywood and residues – increased significantly during the period, particularly in the second half. Focused operational improvement programs, new product lines, further development of export markets, and strengthening of underlying domestic markets have established a sound base for the Timber business to move forward.

Rationalisation activities in Australia

Rationalisation programs and restructuring of capacity benefited Boral's businesses during the year. Production was managed to closely match demand and consequently inventory levels were held at last year's levels.

During the period the closure of Boral's brick plant at Traralgon in Victoria was announced. This followed the closure of the Moorebank brick plant in NSW, announced last year. Production from these two plants is progressively being transferred to Boral's plants at Bringelly and Badgery's Creek in NSW and to Thomastown in Victoria resulting in more effective kiln utilisation rates and higher plant efficiencies. Capacity upgrades at Bringelly and Badgery's Creek are being undertaken to ensure Boral retains the same level of overall brick production capacity.

Toll crushing arrangements for Pioneer's quarry products at Emu Plains in NSW commenced during the period allowing Boral's Emu Plains crushing plant to be used more efficiently and at a lower cost.

As part of the Greystanes redevelopment project, Boral's construction materials businesses are undertaking a number of restructuring and rationalisation initiatives.

Relocation of Boral Transport's bulk cement powder distribution depot and workshop has commenced, which will significantly improve the logistics of bulk cement distribution from production facilities in the Southern Highlands. Boral's Recycling business is being relocated to Widemere, where a purpose built facility will produce quality, specified materials for re-use in the construction materials markets.

Three Sydney asphalt plants located at Seven Hills, Greystanes and St Peters are being rationalised into one high capacity, cost efficient plant at Enfield in Sydney's central west. This new location will allow increased production of recycled materials and cost-effective rail supply of aggregate from our Dunmore quarry on the South Coast to service the broader Sydney market.

Boral's office facility at Greystanes is being demolished as part of the redevelopment of the site. Boral has leased a new purpose-built facility within the Greystanes Estate allowing centralisation of Boral's Sydney-based construction materials, cement, shared services and business systems personnel.

Growth

Since July 1999, approximately \$425 million has been spent on acquisition and growth projects in Australia, the USA and Asia. During FY2002 \$183 million was spent on growth projects and acquisitions. These initiatives have been value-adding and in line with Boral's strategic intent.

Bolt-on acquisitions

Boral is continuing to pursue new bolt-on acquisitions to leverage strong market positions and core capabilities. Recent acquisitions delivered better than expected results during the period.

In September 2001, the acquisition of Concrite in NSW was completed with the first ten months' contribution exceeding expectations; Boral also acquired Compton Park Quarry, a 970-hectare site with over 100 million tonnes of hard rock reserves which is located in the NSW Southern Highlands and complements Boral's very strong aggregates position in and around Sydney.

The Concrite acquisition followed the acquisition of the Alsafe concrete business in Victoria in FY2001, which contributed a full year result in FY2002.

In July 2002, Boral announced its third "bolt-on" acquisition in Australian concrete since demerger with the acquisition of a 50% stake in Go-Crete. Go-Crete has 5% market share in the Western Australia concrete market and also has a leading position in the WA pre-cast panel market.

The acquisition of 71% of Siam Gypsum through the Asian Plasterboard joint venture was finalised in August 2001 and has contributed a stronger than expected first year profit.

In the USA, MonierLifetile (50% owned by Boral) completed the acquisition of a concrete tile business in Kansas City in August 2001; this operation has performed well during the period.

Asian Plasterboard growth

Boral's Asian Plasterboard joint venture business with Lafarge delivered a strong profit uplift in the first half which continued into the June 2002 half. Boral's full year result of \$18 million was \$15 million above last year's result.

The features of the Asian Plasterboard result were:

- Improved returns from South Korea;
- Full year contribution from the 71% acquisition of Siam Gypsum Industries in Thailand;
- Improved results in China following consolidation and rationalisation of activities in Shanghai: this business achieved a small positive EBITDA outcome for the year;
- The relocation of a 30 million m² plant from Shanghai to Seoul, which has now commenced production;
- Construction of a small, low-cost plant at Chongging in China;
- Stronger volumes in Indonesia and Malaysia and improved prices in Indonesia;
- Lower interest expenses due to low interest rates and lower debt levels.

Boral's plasterboard sales volumes in Asia also benefited from underlying demand growth arising from the substitution of alternative building materials by plasterboard.

Boral's shareholding in the Asian Plasterboard joint venture with Lafarge increased from 43% to 48% during the period and will increase to 50% by 30 June 2003.

Plant upgrades & capacity expansions

Blue Circle Southern Cement's newly completed Marulan Lime kiln upgrade was completed in February 2001 and operated to full capacity during the period to meet demand in Australia's growing lime market.

Blue Circle is currently de-bottlenecking its Victorian cement works at Waurn Ponds, by increasing cement grinding capacity by 80,000 tonnes pa at a cost of \$16 million; this increased capacity is expected to come on line in the March 2003 quarter.

Construction and commissioning of a new concrete plant at Deer Park on the site of Boral's Deer Park quarry in Melbourne, was completed in the first half of the year. During the second half, the new plant was running to full capacity. In addition, Boral's North Melbourne concrete plant was upgraded during the year to significantly increase capacity to service strong demand from the Melbourne inner city market.

In Timber, compensation funding of \$22.5 million, which is to be re-invested by December 2005, was granted to Boral from the Federal and NSW Governments as part of Boral's Exit Assistance claim; in this context, a \$6 million upgrade was completed at the Koolkhan timber mill during the period. Whilst further opportunities to invest in growth in hardwoods exist, we are currently waiting for confirmation of resource security from the NSW Government before we commit further funding to this part of the business.

Commissioning of the \$25 million upgrade of the softwood mill at Oberon (50/50 JV with Carter Holt Harvey) was finalised at the end of 2001; the mill now has advanced technologies and is an extremely cost efficient operation.

In the USA, Boral's new \$20 million clay paver plant in Augusta commenced production during the period. MonierLifetile (50% owned by Boral) completed construction of a new plant in Mexico, which was fully operational by December 2001 but is still operating at low utilisation levels. Construction by MonierLifetile of a new \$20 million concrete tile plant in Colorado also commenced during the period and is due for completion by November 2002.

A \$12 million upgrade of the US Clay Tile plant in California was completed during the year resulting in increased production capacity and improved plant efficiency.

Quarry End Use

In its second year of operation, the Quarry End Use (QEU) business unit delivered a strong result of \$28 million predominantly from the Greystanes Development. Boral is adding financial and environmental value and has created a business unit that will provide a revenue stream well beyond the next ten years. Further QEU projects will come on line over the next two years including the Penrith Lakes Development (Boral has a 40% shareholding) and Boral's former Moorebank brick site. Boral is also reviewing other sites for future development opportunities.

In August 2002, Boral announced the formation of a partnership with Delfin Lend Lease to develop the 104-hectares of residential lands as part of the Greystanes redevelopment program. This strategic partnership will draw on the marketing and development expertise of Delfin to deliver an estimated \$300 million whole of project revenue stream over the next five years.

The process to rezone the Penrith Lakes site has commenced and we anticipate that rezoning approvals for the residential development of the current quarry sites will be completed within the next year. We anticipate that the project will commence generating revenues within two years of rezoning and will continue for approximately 10 years.

operation will allow the site's old clay quarry to be filled with clean material over approximately five years. Application to rezone the 102-hectare site to accommodate approximately 1,000 dwellings has been made and, once approved, development activity is expected to commence in late 2003 and to continue over a six-year period.

PERFORMANCE AGAINST OUR FINANCIAL OBJECTIVES

Boral has previously announced its financial objectives and is focused on them. Boral's financial objectives are to:

- Exceed the weighted average cost of capital (WACC) on a sustainable basis through the building cycle.
- Deliver better financial returns than the competition in comparable markets.
- Deliver superior total shareholder returns.

Exceeding WACC - sound capital and balance sheet management

The 2002 full year returns exceeded Boral's weighted average cost of capital. Return on funds employed for the period was 12.1%. This result supports Boral's goal of exceeding the weighted average cost of capital on a sustainable basis through the building cycle.

Capital expenditure during the period totalled \$302 million. Stay-in-business (SIB) capital expenditure of \$119 million was held to our target of 70% of depreciation during the period. Whilst plant and equipment is generally in good shape, the level of SIB capital expenditure will increase to depreciation levels in FY2003.

Boral's gearing (net debt to equity) reduced from 55% at 31 December 2001 to 45% at 30 June 2002. Gearing remains comfortably within the target range of 40% to 60%. Interest cover increased from 4.3 times to 5.4 times year on year.

US\$300 million of US long-term debt with average 11.6 year tenure, was cost effectively issued during the second half of the year to enhance Boral's funding flexibility.

Better returns than our competitors

Boral continues to perform and grow around its strong reserve positions and #1 or #2 market positions in Australia, Asia and the USA. Boral continued to outperform competitors in Australian construction materials, in the US brick market and in plasterboard in Asia.

In Building Products in Australia, Boral's returns are below acceptable levels but substantive initiatives are being undertaken to significantly improve returns and to close the gap with the competition.

Improved shareholder returns

A final dividend of 10.0 cents per share has been declared, which will be 75% franked. This is an increase from the 2001 final and 2002 interim dividends which were both 9.0 cent dividends with 35% franking. Boral returned an attractive dividend yield, averaging 5.4% (before franking) for the year ended June 2002. The increased dividend and franking level effectively provides a 28% increase in the dividend for most shareholders.

Dividends for the full year totalled \$109 million, resulting in a payout ratio of 57% from after tax income of \$192 million.

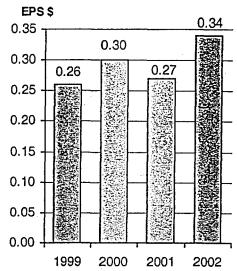

Capital returns for shareholders have also improved. Boral's share price has increased by 64% since the demerger (February 2000) to 30 June 2002, compared with a 2% increase in the ASX100 over the same period. Over the past year, Boral's share price has increased by 31% versus the ASX100, which has decreased by 6%.

shareprice appreciation, dividend yield and franking benefits for Boral's shareholders, has resulted in an annualised TSR of 32% ranking the stock in the top quartile of the top ASX100

group of Australian listed companies.

Earnings per share for the year ended 30 June 2002 was 33.7 cents. EPS has improved by an average of 9% pa over the past three years, compared to the demerger year.

The final dividend will be paid on 19 September, 26 days earlier than last year. Boral will continue to offer a Dividend Reinvestment Plan for shareholders. To minimise EPS dilution, Boral intends to complete an on market buy-back equivalent to DRP share issuance.

CORPORATE GOVERNANCE

KPMG, Boral's external auditors, have advised that they propose to issue an unqualified audit opinion on Boral's financial report. As a corporate governance matter, full assurances about the accuracy and integrity of the Company's accounts have been provided by senior management and the Board is satisfied as to the reliability and quality of Boral's financial reporting.

Boral's internal audit function, which is outsourced to PricewaterhouseCoopers, provides further assurance to the Board of the adequacy of internal controls within Boral.

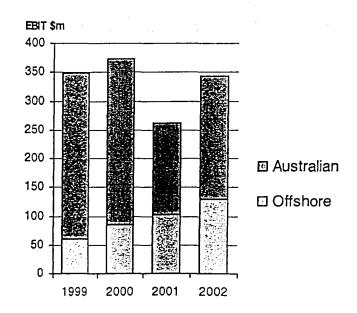

SAFETY AND SUSTAINABLE DEVELOPMENT FOCUS

Following significant improvement in the prior year, Boral's safety performance was sustained during the year ended June 2002, with the frequency of employee lost time injuries (per million work hours) maintained at an average of 4. The Company is strongly committed to further improving its safety performance.

During the year, Boral successfully rolled out a Sustainability Self Diagnostic Tool to determine the status of its businesses and to establish sustainability improvement targets and plans. A base level against which to monitor, measure and target performance of key environmental and social improvement programs has now been established.

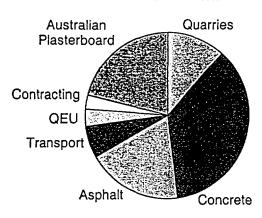

OPERATIONS REVIEW

The growing importance of overseas operations has led to the separate reporting of Asia from the Australian Building Products and Construction Materials segments. The Asia reporting segment includes results for Plasterboard Asia and Indonesian Concrete and Quarries. The Building Products and Construction Materials reporting segments consist of Australian operations only.

Constituction materials, Australia

Revenue per employee, \$m	0.344	0.331	

^{*} Including acquisitions

Whilst volumes driven by the infrastructure and non-dwelling market segments remained depressed during the period, Boral's Construction Materials businesses in Australia benefited from the upturn in the housing sector in the second half. Construction Materials reported an EBIT of \$143m for the full year, 25% up on the prior corresponding period, on revenues of \$1,640m (up 8% on the prior year).

Construction Materials' EBIT included a \$28m profit from QEU operations (compared with \$24m in FY01), together with ten months of better than expected earnings from the newly acquired Concrite operation, growth in BCSC's lime markets and improved pricing in cement and quarries. EBIT to sales margin increased to 8.7% compared with 7.5% in the prior year.

Building Products, Australia

Revenue per employee, \$m	0.271	0.259	

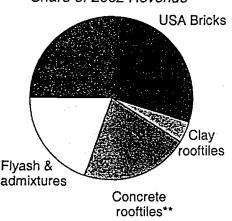

^{*} Including acquisitions

Building Products in Australia delivered a full year EBIT of \$85 million, which was 30% above last year, on revenues of \$999 million, which were 5% above last year. Second half EBIT for Building Products, Australia of \$49.0 million was 153% ahead of the June 2001 half-year result.

Building Products' result was adversely impacted by the loss of profits following the divestment of the Windows lineal and extrusion operations, Tasmanian Woodchips, and Tumbarumba Softwood mill in the prior year. However, this was more than offset by a strong turnaround in Australian housing activity benefiting Timber, Plasterboard and Clay & Concrete Products. The Windows fabrication business delivered a significant performance turnaround during the year. EBIT to sales margin increased to 8.5% from 6.9% in the prior year.

USA

Share of 2002 Revenue

**Boral's share of revenues from the MonierLifetile concrete tile JV do not appear in Boral's consolidated accounts. Boral's profits from this business are equity accounted.

^{*} Including acquisitions

Boral's USA operations delivered its sixth consecutive year of profit growth contributing a full year EBIT of US\$57 million, which was 9% ahead of last year. In Australian dollar terms, USA

EBIT was 10.5% up at \$110 million including a \$2 million favourable exchange rate impact. US Bricks delivered a strong result despite economic uncertainty, with steady volumes and improved prices coming through in resilient market conditions. There was a strong focus on capital and restructuring in US Tile, MonierLifetile and flyash operations during the year. Despite improved pricing in roof tiles and operational improvements in flyash and MonierLifetile, a volume decline in roof tiles of around 5% and one-off restructuring costs offset some of the positive gains. EBIT to sales margin improved to 13.8% compared with 13.1% in the prior year.

Asia
Asian Plasterboard (joint venture with Lafarge) and Indonesian Concrete (Jaya Readymix)

Boral's share of revenues from the Asian Plasterboard joint venture do not appear in Boral's consolidated accounts. Boral's profits from this business are equity accounted.

Year ended 30 June	2002	2001	% change
Sales revenue, \$m	53	38	39
EBIT, \$m	20	4	405
Funds employed, \$m	192	145	
EBIT return on funds employed, %	10.2	2.7	

Results for Asia reflect full year benefits of the Asian restructuring program, which has moved it from a loss making position two years ago to a strong full year EBIT of \$20 million. Steady volume improvements in South Korea, Indonesia and Malaysia together with the full year benefits of the Siam Gypsum Industries acquisition in Thailand have contributed to this year's result. Consolidation and rationalisation of activities in Shanghai involving the relocation of the 30 million m² plant from Shanghai to Seoul and construction of a small, low-cost plant at Chongging in China also contributed to the improved performance.

A strong foundation has been built for ongoing performance and growth in plasterboard in Asia.

Boral's Indonesian concrete business, which has approximately 30-35% of the pre-mix market, is benefiting from underlying market recovery.

Housing approvals in Australia for the March quarter fell by 2.5% on the prior quarter and in the June 2002 quarter remained stronger than expected (dropping only by 0.5% on the March quarter). The six months to December 2002 should reflect a high level of activity flowing through from approvals. The June 2003 half is harder to forecast but we expect demand to reduce from current levels.

As expected, Australian non-dwellings and roads, highways & sub-divisions project activity should build during FY2003, driven by emerging large project work. This volume increase will largely benefit Boral's construction materials markets in Australia.

Overall revenues for Boral's Australian building products businesses are expected to be relatively flat during FY2003, with gradual increases in non-residential work and improved underlying performance offsetting weaker housing volumes in the second half. Australian Plasterboard prices are likely to be negatively affected by competitor and import pressures but this should be offset by operational improvements in Masonry, Bricks, Roofing and Timber.

FY2003 earnings for construction materials Australian businesses are expected to increase due to strengthened pricing and increased non-residential and infrastructure volumes in Australia; EBIT margins are expected to strengthen accordingly.

Quarry, concrete and cement price increases from early in the June 2002 quarter will have a full year impact in FY2003 for Boral's construction materials operations in Australia. Boral has also advised its customers of further price increases for cement, aggregates and pre-mix concrete to take effect in the December 2002 quarter.

Dependent upon timing of approvals, the Quarry End Use business unit should achieve similar profits in FY2003 to those reported for the past two years.

Asian profits are expected to remain strong. Further strengthening is possible due to increasing plasterboard penetration, underlying economic growth in Asia and plasterboard capacity increases in Korea. However, increased manufacturing overheads and possible price weakness associated with increased industry capacity in Korea could be negatives.

The outlook for the USA housing market is unclear in FY2003. Whilst we expect some softening in demand because of a weak economy and lower consumer confidence, we also expect residential demand to continue to show resilience in the current low interest rate environment. Boral's US earnings are expected to be favourably affected by underlying operational improvements in bricks, tiles and flyash operations.

There will be a continued focus on PEP/ operational improvements in all divisions and stay-in-business capital expenditure is expected to be around the level of depreciation for FY2003 (following three years of restraint at 70% or less of depreciation). There will be continued restraint on working capital levels.

Boral will have increased balance sheet flexibility for growth in FY2003 due to strong operational performance, conservative gearing and a stronger share price.

Boral's underlying profit performance in FY2003 is expected to exceed the FY2002 profit after tax of \$192.4 million.

The Environment

All activities conducted at Boral's operating sites in Australia and overseas, which number more than 570, are conducted under relevant environmental legislation and regulations. Our businesses either hold, have applied for, or are currently negotiating all relevant environmental licences, permits and plans. Compliance is the minimum operational requirement under Boral's Environmental Policy.

Within Boral the term "sustainable development" as it pertains to the environment means:

- The non-wasteful use of resources, not just primary feedstock but also energy and water utilisation, and finding ways to reduce the amount of consumption per unit of production of each of these inputs.
- Non-renewable resources can be utilised on the basis of competent and cost effective extraction; sensible, efficient products; optimal recycling and reuse, and progressive development and employment of supplemental materials (eg, flyash, blast furnace slag) and alternative energy (eg, tyres, tallow, anode carbon dust).
- Minimising any adverse impact on the environment at extractive and manufacturing locations (eg. emissions and discharge, the protection of fauna and flora, aboriginal heritage).
- Exercising a high level of care and responsibility in the rehabilitation and, where required, remediation of sites.
- Taking into account community needs and expectations, as well as financial considerations, in all operations.

Energy Usage and Greenhouse Gas Emissions
Boral collected data this year on all forms of energy
use by its operations in Australia and created a
GHG emissions database. This database will enable
us to focus our efforts on reducing energy usage
and GHG emissions. It is interesting to note that
less than 60 of Boral's sites produce over 90% of
Boral's Australian GHG emissions.

Since 1998, Boral has been a Partner in the Sustainable Energy Development Authority (SEDA) Energy Smart Business Program. This commits us to the implementation of cost effective energy efficiency projects in NSW. Since inception, Boral has completed projects resulting in savings of 177,710GJ of energy and 20,157t CO₂e. We have made significant progress towards qualifying for the SEDA Silver Award and have further projects planned or being implemented at cement, brick and plasterboard plants.

Boral's cement business, Blue Circle Southern Cement (BCSC) participates in the Australian Federal Government's Greenhouse Challenge Program through an industry co-operative agreement with the Cement Industry Federation (CIF). The Greenhouse Challenge program aims to reduce emissions of greenhouse gases such as carbon dioxide, which in the case of the cement industry is primarily generated during the cement manufacturing process. BCSC has introduced changes to its business practices to incorporate a Greenhouse Energy Management System (GEMS) to achieve CO, emission savings, and in addition, to monitor and report CO, emissions as a part of the Australian cement industry commitment to greenhouse gas abatement action.

In 2002, the Australian Greenhouse Office has undertaken independent verification of the cement industry's Greenhouse Challenge cooperative agreement. This has involved detailed auditing of the BCSC emission inventory and abatement action plans by an external verifier. Emission abatement actions reported for the 2000/01 reporting period include increased use of mineral additions and supplementary cementitious materials, reduced fuel use in kilns, reduced electricity consumption, and increased use of wastes as fuel substitutes.

Since 1990, direct (fuel and process) greenhouse gas (GHG) emissions by the cement industry have decreased by 3% despite a 6% increase in production of cementitious material.

BCSC has contributed to the public reporting of the Australian cement industry dioxin emissions, through its participation in the development of the CIF's Dioxin Technical Note.

Timber operations

Boral sources timber for its hardwood operations in Northern NSW pursuant to a Wood Supply Agreement with the State of New South Wales and State Forests of NSW. The Agreement has a 20 year term expiring in 2018. The timber supplied by State Forests is from regrowth forests and does not fall into the category of High Conservation Value, Old Growth Forest.

A Regional Forest Agreement (RFA) for North East New South Wales between the Commonwealth of Australia and the State of New South Wales was entered in March 2000. The RFA ensures effective conservation, forest management and forest industry outcomes and formalises the framework for the management of the forests from which State Forests supplies timber to Boral. The signature of the RFA followed a rigorous process which commenced in 1995 and assessed native forests for conservation, recreation and cultural values. A wide range of stakeholders including industry, environmentalists and local community groups as well as governments participated in the RFA process.

Recycling and Reuse

Developments continue in the areas of recycling such as the use of aluminium industry by-products in cement, concrete and asphalt manufacture. The acceptance of recycled asphalt and concrete materials in new building and construction materials is encouraging greater recycling of road construction and demolition wastes.

Over 70 contaminated sites have been remediated since the mid-1990's and the total cost of remediation since the Boral demerger has been in excess of \$12 million. In particular, asphalt sites that often dated back to the late 1940's have been a source of considerable concern and effort.

Most of our high risk sites have now been dealt with, but it is Boral's policy that any site to be divested or to have its lease terminated will undergo environmental assessment to ensure that minimal environmental risks, and therefore liabilities, remain.

We are also committed to protecting flora and fauna and have identified several major operations where Boral owned land could be "quarantined" or even "traded" to establish wildlife corridors or extend adjacent reserves.

Management Systems

This year 583 Boral employees in Australia received training in Environmental Improvement Plan (EIP) Implementation, Environmental Compliance Auditing and other courses. In addition, there were a number of business specific environmental briefings. Environmental training in the USA is undertaken on a routine basis with around two thirds of the workforce going through one or more sessions.

We are moving from a hard-copy system of statebased Environmental Legislation Summary Manuals to an Intranet based system which can be easily accessed by any Boral employee.

Boral also continues to implement an internal Compliance/System Audit program (48 full audits and 87 short-form audits were undertaken during the year), to develop Environment Improvement Plans (EIPs) for all significant operations, and to integrate environmental management systems with general business management and quality systems.

Environmental Performance

Line management records environmental incidents and other environmental measures, including audit actions closed out, emergency drills conducted, compliance performance and significant environmental improvements. Reports on environmental performance are reviewed monthly by senior management and periodically by the Board.

This year saw a pleasing decrease in the frequency of environmental infringements across Boral and its subsidiary companies internationally. No penalties for Tier One or Two offences were imposed however in NSW, the EPA issued three Penalty Infringement Notices (PINs) consisting of \$4500 for a single incident (an acid spill) at a concrete batching plant at Blacktown, and a \$1500 PIN for failing to maintain and operate a water cart in a proper and efficient manner at Kiama quarry.

As required, Boral also reported to the National Pollutant Inventory for over 30 operations that exceeded the relevant threshold levels. Operations that reported include larger quarries, brickworks, asphalt batching plants and timber mills. Also, after a co-operative determination with the NPI office of emission estimation factors using representative Australian industry stack emission data, Boral's three major plasterboard manufacturing operations reported for the first time. All Boral sites strive to reduce emissions both to lessen environmental impacts and to lower licence fees.

ENVIRONMENTAL POLICY

Boral is committed to pursuing industry specific best practice in environmental performance. As an international resources-based company, we acknowledge that our shareholders, employees and the community at large expect responsible environmental practice by Boral's businesses.

Boral embraces the principle of sustainable development, ie. development which meets the needs of the present without compromising the ability of future generations to meet their own needs. We believe this principle is fundamental to Boral's continued success and growth.

Specifically Boral is committed to:

- complying with environmental legislation, regulations, standards and codes of practice relevant to the particular business as the absolute minimum requirement in each of the communities in which we operate
- conducting our operations to minimise and, wherever practicable, eliminate adverse environmental impacts
- continual improvement of our environmental performance including regular review and the setting of rigorous environmental objectives and quantified targets (particularly with regard to the efficient use of energy and materials, the minimisation of waste and the prevention of pollution)
- conducting business with suppliers and contractors who also have a commitment to a responsible environmental policy
- remediating our contaminated sites to standards internationally acceptable for the site purpose.

To support this commitment, Boral will progressively implement and maintain environmental management systems for its businesses based on the international standard ISO 14001 ("Environmental management systems – specifications with guidance for use") or its equivalent, and will also concurrently implement the Boral HSE Best Practice Elements.

Through communication and training, all employees and contractors will be encouraged and assisted to enhance Boral's environmental awareness and performance.

DIRECTORS' QUALIFICATIONS, EXPERIENCE AND SPECIAL RESPONSIBILITIES

Kenneth J. Moss Non-executive Chairman, age 57

Dr. Moss joined the Boral Board in 1999 and became the Chairman of Directors in 2000. He had an international career with the Royal Dutch/Shell Group from which he retired as Chairman and Chief Executive of Shell Australia. He holds a chemical engineering degree (Honours) and a doctorate of philosophy from the University of Birmingham.

REMUNERATION

Fees of non-executive Directors are determined by the full Board within an aggregate of \$650,000 approved by the Company in general meeting. In considering the level of fees to be paid, the Board takes account of survey and other information on the average fees being paid by peer group companies. Non-executive Directors do not receive any performance-related incentives.

Part of the role of the Compensation Committee is to advise the Board on the remuneration policies and practices for Boral generally and the remuneration arrangements for senior executives. These policies and practices are intended to attract, motivate and retain quality people.

Remuneration of Boral executives is structured to reflect Boral's performance and increase shareholder value. In determining or recommending remuneration and incentives for executives, regard is given to performance and comparable market rates.

Remuneration for senior executives comprises fixed or base remuneration and variable remuneration (incentives).

Fixed remuneration includes base salary, any non-cash benefits such as company cars and in most instances, superannuation contributions. Fixed remuneration is generally set around the median paid by comparable companies for similar jobs.

There are both short term and long term incentives for executives.

Short term incentives comprise cash bonuses. As long-term incentives, the Company makes annual grants to senior executives under the Boral Senior Executive Option Plan or the Boral Executive Share Plan.

Incentives for executives are directly related to business results, where the focus is on profit related to assets employed (Profit After Funding), and individual performance. With incentives being related to business results, the performance of the Company and the operating divisions is reflected in incentives awarded to senior executives.

Information regarding options issued during the year under the Boral Senior Executive Option Plan is provided in the Directors' Report.

Under the terms and conditions of the Boral Executive Share Plan, the Company makes an annual grant to a trust for the purpose of acquiring shares in the Company on the stockmarket and these shares are allocated to senior executives in the books of the trust. Executives are only entitled to a transfer of the shares in accordance with the terms and conditions of the Plan.

BORAL AGREES TO PURCHASE ROCLA PERSADA IN INDONESIA

Boral Limited announced today that it has agreed to acquire the Rocla Persada concrete pipe business in Indonesia from Rocla Limited.

The Rocla Persada concrete pipe plant is located near Jakarta and services the Indonesian and some export markets. This acquisition will be a small add-on to Boral's current concrete and quarries business in Indonesia.

Executive General Manager of Boral's Cement division, Phil Jobe, said "Boral understands the Indonesian construction materials market and we believe we can add value to this small but strategic operation. The acquisition of the Rocla pipe business provides Boral with the opportunity to gain an understanding of the pipe market in a modest way."

Conditions of the purchase include Indonesian Government approvals.
